Our company's main objective is design, manufacturing and distribution of electronic equipment, which is conducted competitively and with assurance of the highest quality. Our services are realized with our clients' and employees' highest satisfaction in mind.

These values are supported by:

- engaging employees in creating the products that meet the clients' needs and expectations
- partnerships with clients
- optimal choice and control of suppliers and their products reliability
- continuous training and ensuring development of our employees' qualifications and competences,
- continuous improvement of quality management system and meeting regulatory and other obligations
- full acknowledgment and support of our quality policy by our staff

Quality is a tool for reaching our strategic goal which is strengthening our position in the market and has paramount influence on ensuring satisfactory financial results. That is vital for further development of our company.
